RUGBY'S PREMIER TRAINING SYSTEM

TECHBASE LAYER

## TECHBASE 22

The Rhino TechBase Panel System is an innovative, modular sports-floor systems for both indoor and outdoor use. The system allows for both speedy and durable installations, along with reducing the need for major groundworks. Its unique properties create a strong and consistent base of any sports synthetic turf, along with its formulated structure which absorbs impacts whilst ensuring the surfaces performance are both safe and forgiving for both training and match conditions.

### Technical data

#### MATERIAL

Material Recycled post industrial polymer  
UV stabilisation Limited

#### PRODUCT

Dimensions 753mmx566mmx22mm 1 panel is 0,426 sqm  
Weight 1,93 kg per panel; 4,55 kg per sqm  
Shape Hexagonal cell structure  
Anti slip system Min 2000 barbs per panel  
Locking system Clicking system

#### TESTING

GMAX value 137  
Load capacity 374 psi up to 998 psi  
Vertical drainage 1.600 per hour / 40.180 mm per hour  
Horizontal drainage 130" per hour / 3600 mm per hour  
Water storage capacity 7,5 liters per panel  
Expansion 2.4 mm over the length at 60 °C  
Slip resistance 2x higher than crushed stone  
FIFA Panel system can be used under approved 2\* system
